

NIRT Journal club (2017-2018)

- What : Journal Club
- When : Every Wednesday at 2.00 to 3.00 pm
- Where : Robert Koch Auditorium
- Why : Journal Club is an integral part of the academic activity within an institute, to improve our current understanding and knowledge of our research focus and to disseminate them to our co-workers.
- How : Assigned person as per the alphabetical order should select an article of his/her interest, published recently and to circulate the PDF by Monday to NIRT ALL for the following Wednesday's presentation by PowerPoint for about 45 to 60 min.

List of journals for their respective department's interest has been enclosed, to keep them aware of which articles are published in the current issues. However, the presenter have a choice of selecting any recent article for presentation (published maximum of 6 months earlier), except review article and their own recently published articles. Instead they are welcome to present their work in progress/proposals if they would like to. This can facilitate active discussion and help them to proceed further.

In case of any invited or guest speaker's presentation, happened to be on Wednesday, the scheduled presenter will do their presentation on the following week.

It will the presenter's responsibility to identify an alternate person to present on the scheduled date within his/her department, in case of their absence. And they will be having their turn on the following week, or the other person's slot.
